

CLAIMS

What is claimed is:

1. A headset comprising:
a receiver to receive a display command through a wireless link; and
a processor coupled to render an image according to the display command.
2. The headset of claim 1, wherein the headset includes a monocular display to display the image.
3. The headset of claim 2, wherein the headset receives the display command from a server to change an image displayed on the monocular display.
4. The headset claim 1, wherein the receiver receives a compressed display command.
5. The headset of claim 4, wherein the processor decompresses the compressed display command.
6. The headset of claim 5, wherein the processor decompresses the bitmap file in accordance with a Motion Pictures Experts Group (MPEG) protocol.

7. The headset of claim 1, wherein the wireless link includes a Bluetooth enabled link.

8. A computer-readable medium having stored thereon a set of instructions to translate instructions, the set of instructions, which when executed by a processor, cause the processor to perform a method comprising:

a headset receiver receiving a compressed display command through a wireless link; and

a headset processor decompressing the compressed display command, and displaying an image according to the display command.

9 10. The medium of claim 8, including a headset mounted monocular display displaying the image.

10 11. The medium of claim 8, including the headset receiver receiving a compressed bitmap file for the display command.

11 12. The medium of claim 11, including the headset processor decompressing the compressed bitmap file in accordance with a Motion Pictures Experts Group (MPEG) protocol.

12 13. A method comprising:

a headset receiver receiving a compressed display command through a wireless link; and

a headset processor decompressing the compressed display command, and displaying an image according to the display command.

13 14. The method of claim 13, including a headset mounted monocular display displaying the image.

14 15. The method of claim 13, including the headset receiver receiving a compressed bitmap file for the display command.

15 16. The method of claim 15, including the headset processor decompressing the compressed bitmap file in accordance with a Motion Pictures Experts Group (MPEG) protocol.
